

CG 811 CARTRIDGE REFILL MACHINE

www.cartridgegate.com

Black filling with right volume adjustment from nozzle..

Functional chromium filling and vacuum apparatus..

TECHNICAL FEATURES

Many black cartridge models can be filled from nozzle thanks to special and functional chromium apparatus. Clogged cartridges can be seen thanks to pressure gauge.

System can be integrated to 800 series machines.

Cartridges that filled with chromium apparatus can be filled perfectly thanks to volume adjustment bar which is first on the world.

For clogged cartridges speed reduced and filling repeated thanks to automatic speed controlled pumps while filling with chromium apparatus.

Ink in the cartridge can be emptied to waste or clean ink tank.

Black cartridges with felt, which are can not be filled with apparatus, are can be filled with special sensitive needle.

With keypad counter can be followed or device can be adjusted.

Easy to use with colorful buttons and path on the panel.

Warning signal when ink finished in the tank.

Warning signal for clogged cartridges.

Chromium body, follow operation with sound (buzzer), design for no need to extra device, low energy consumption, microcontroller based control.

Ink tanks can be enlarged and changed easily.

Design for easy to maintenance.
